To figure your cost of finished vertical take list price of standard vertical, add price for motorization and remote control above, then deduct your discount.

**DECOMATIC® TRACK SYSTEM  
MOTORIZED OPTIONS:**

The unique Decomatic® Motor System has been designed modular to maximize the control options available to you. The three basic control options, wall switch, remote control, and timer are available in any combination and can be added as needed.

A central control unit is available and able to control several blinds from one location, yet still allow local operation for each individual blind or group of blinds.

*Slim, heavy duty motor*

**Wall Switch**

**Remote Control**

**Timer**

The touch controls provide easy vertical adjustment. Wall switch or remote, one touch will rotate louvers 180 degrees. When traversing, louvers will automatically rotate 25 degrees first, eliminating carrier breakage. The single modular timer allows the consumer to program the rotation and traversing of vanes on one track.
